COMMITMENT TO CONSERVATION

Leading our Tanzania wildlife management is our affiliate, the Friedkin Conservation Fund (FCF), a non-profit organization focused on impactful philanthropy and conservation initiatives throughout Tanzania.

Working in conjunction with our affiliates, FCF is responsible for safeguarding two vast wilderness areas that form vital buffer zones to the Greater Serengeti and Ngorongoro Crater ecosystems. To do this, FCF engages the communities that share the land with us as partners in conservation and collaborates with stakeholders in effective wildlife management and research.

Community empowerment is the cornerstone of FCF's work. This includes implementing initiatives aimed at education, improving health, and providing training in sustainable income-generating opportunities for communities neighboring our protected wildlife areas. Through these efforts, FCF aims to uplift local communities and demonstrate the value of protecting these ecosystems. Combined with conservation projects such as anti-poaching, wildlife monitoring, and habitat management, this holistic approach enables FCF to make a tangible impact in its efforts to protect this vital wilderness.
